

# LIQUID STICK-PACK MOUTHWASH

## Product case study

We offer our customers two types of collaboration: the development and manufacturing of new products based on their specifications, and/or a turnkey product from our product list.

**Product:** Mouthwash

**Status:** Cosmetics

**Volume:** 15\*10ml

**Packaging:** Assembly of several components to guarantee and ensure the stability of the product over time

## Benefits of the Liquid Stick-Pack

## Odontological Control

The clinical and odontological tolerance as well as the acceptability in the normal conditions of use were evaluated under the control of a Dermatologist.

This allowed to highlight an "excellent odontological tolerance on gums and teeth" as well as more than **85%** of positive answers to the main claims of fresh breath and healthy mouth feeling.

- Dr. Michel Riche
